

# Hazard Mitigation Workshop

## Course Information

The Oklahoma Water Resources Board (OWRB) is pleased to announce a **free** Hazard Mitigation workshop for Oklahoma insurance licensees at our Oklahoma City office January 18, 2018. This event is a great opportunity for insurance agents to learn about the liabilities of owning a jurisdictional dam and water well because the responsibility is often costly for both individual home/land owners and their insurance companies. At the end of the workshop, participants will be able to identify property locations on FEMA Flood Insurance Rate Maps (FIRMs) and determine whether or not flood insurance is required. Attendees will be introduced to useful resources, including the OWRB's website, which offers information on dam locations, floodplain zones, surface and groundwater permits, and State rules and regulations.

Continuing Education Units: 3 hours

For more information and registration, please contact Emma Moradi at [emma.moradi@owrb.ok.gov](mailto:emma.moradi@owrb.ok.gov).

**January 18, 2018**  
**9:00am - 12:00pm**
