SUBJECT: Clean Water State Revolving Fund (CWSRF) FY 2011 Project Priority List  
*Call for Wastewater/Nonpoint Source Pollution Control Projects*

State FY 2011 is fast approaching and we are anticipating another productive funding cycle for the CWSRF. Oklahoma has received approximately three times our annual federal appropriations to be obligated within the next year.

Additionally, we are finalizing working with the U.S. Environmental Protection Agency our application to the U.S. Environmental Protection Agency Region to extend the current 20-year maximum loan term to a 30-year maximum, according to the useful life of the project. We anticipate approval by July 1, 2010 and We hope that this flexibility will provide a better financing options for certain borrowers.

Consequently, as part of the FY 2011 strategic planning effort we are identifying eligible wastewater projects and other pollution control activities in order to ensure funds are available through an anticipated leveraged bond issue this summer. Eligible projects include wastewater projects, urban stormwater and landfill pollution control, abandoned "brownfield" site clean-up, nonpoint source, green infrastructure, water efficiency, energy efficiency, innovative green projects and source water protection activities.

Please advise us by no later than April 23, 2010, if you are aware of a project planning to take advantage of funding opportunities through the CWSRF Program. The FY 2011 list includes projects targeted for funding between FY 2011 (beginning July 1, 2010) through FY 2015. Interested entities should submit a request letter including the following information:

- 1) project description
- 2) cost estimate, and
