PROPOSED
APPENDIX A UPDATES

INTRODUCTION

During the continuing usage and review of the Standards documents, small, non-substantive changes are sometime necessary. The following are such changes:

In an effort to standardize the nomenclature used in Appendix A of the Oklahoma Water Quality Standards with other state and federal databases, Oklahoma Water Resources Board (OWRB) staff is proposing changes to modify the format of several waterbody names. In most cases, the OWRB is using the Federal Geographic Names Information System (GNIS) and the National Hydrography Dataset (NHD) as sources for the lake names. Correcting these naming formats and standardizing with other established databases only helps strengthen the usability of the Standards document.

The Oklahoma Department of Environmental Quality has provided the OWRB with information indicating several additions, changes, revisions, or clarifications to waterbody IDs. These changes come from new and better information as well as correction of typos regarding the WaterBody Identifications (WBIDs).
