

Oklahoma Comprehensive Water Plan - Public Water Supply Planning Guide  
 Table 3-9: Potential Water Contamination

| System Name                               |                                |                              |
|---|--------------------------------|------------------------------|
| <b>PHYSICAL CONTAMINATION<sup>1</sup></b> |                                |                              |
| Contamination Sources                     | Current Methods for Mitigating | Mitigation Improvement Ideas |
|   |                                |                              |
| <b>CHEMICAL CONTAMINATION<sup>2</sup></b> |                                |                              |
| Contamination Sources                     | Current Methods for Mitigating | Mitigation Improvement Ideas |
|   |                                |                              |
| <b>OTHER TYPES OF CONTAMINATION</b>       |                                |                              |
| Contamination Sources                     | Current Methods for Mitigating | Mitigation Improvement Ideas |
|   |                                |                              |

<sup>1</sup> Such as that occurring from stormwater runoff.

<sup>2</sup> Such as that from mine drainage, landfill leakage, municipal and personal wastewater treatment systems, agricultural runoff, etc.
