

Oklahoma Comprehensive Water Plan - Public Water Supply Planning Guide
Table 6-5: Conservation Scenario Water Demand Projections

System Name					
List potential conservation activities for your system and corresponding savings below.					
Conservation Activity		Conservation Assumptions	Estimated M&I Water Savings 2030 (AFY) ¹	Estimated M&I Water Savings 2060 (AFY) ¹	Information Source(s)
From the list above, select the conservation activities that seem the most reasonable for your system and list only those in the table below. Note: Combining activities in lieu of implementing individual activities may be the most effective way for recognizing water savings.					
Year	Selected Conservation Activities	Baseline Water Demand (AFY)	Estimated M&I Water Savings (AFY) ¹	Revised M&I Water Demand (AFY)	Information Source(s)
Notes:					
Year	Corresponding to the year entered above, make notes below describing what actions would be necessary to implement each conservation activity or if further evaluation of activity is needed.				

¹ M&I water savings in the OCWP are estimated at the county level. Estimate the portion of water savings that is applicable to your system.
