Subject: Arbuckle Aquifer

As a land owner that depends on the Arbuckle aquifer for water, it is imperative that we take the necessary steps to conserve water for human usage. I own land that has 3/4 of a mile of the Delaware Creek running through my property. This creek provides water to livestock and wild life. I am not in favor of large quantities of water being used to wash off rock when our very survival requires water from this aquifer. Without a water well, it would be a GREAT inconvenience to have to haul water for my family's consumption.

I encourage you to restrict the amount of water usage from the Arbuckle Simpson Aquifer.

Without this aquifer, many communities and the local economy will be affected. Tourism is a major business that local communities depend on for survival.

There has already been a study completed providing recommendations.
At a minimum, these recommendations should be followed!

Last but not least, the Oklahoma Water Board should maintain the monitoring of this precious resource.

Respectively,

Austin LeMay
