September 13, 2021

To the Directors of the
Oklahoma Department of Environmental Quality
Oklahoma Drinking Water State Revolving Fund Loan Program

We have audited the financial statements of the Oklahoma Department of Environmental Quality/Oklahoma Drinking Water State Revolving Fund Loan Program (the "Program") for the year ended June 30, 2021. Professional standards require that we provide you with information about our responsibilities under generally accepted auditing standards, Government Auditing Standards and the Uniform Guidance, as well as certain information related to the planned scope and timing of our audit. We have communicated such information in our letter to you dated February 11, 2021. Professional standards also require that we communicate to you the following information related to our audit.

Significant Audit Findings

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by the Program are described in Note 1 to the financial statements. No new accounting policies were adopted and the application of existing policies was not changed during 2021. We noted no transactions entered into by the Program during the year for which there is a lack of authoritative guidance or consensus. All significant transactions have been recognized in the financial statements in the proper period.

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected.

The most sensitive estimate affecting the Program's financial statements at June 30, 2021 is the provision for loan losses. Management's estimate of the reserve for bad debt allowance for the Drinking Water State Revolving Loan Fund is based upon reserving the next principal payment due by the debtor in instances in which the debt coverage ratio for that debtor is less than the required 1.25%.

The financial statement disclosures are neutral, consistent, and clear.
Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are trivial, and communicate them to the appropriate level of management. Management has corrected all such misstatements. The following summarizes the adjustments detected as a result of our audit procedures and which have been corrected by management.

Set-Aside Programs:

- The financial statements for the Program's set aside activities are largely created at year end through a series of adjustments which roll financial statement balances forward from year to year. There were no other proposed or recorded adjustments for the Set-Aside Programs.

Revolving Loan Fund Program:

- No adjustments proposed.

There were no other adjustments proposed that were not recorded.

Disagreements with Management

For purposes of this letter, a disagreement with management is a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated September 13, 2021.

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the Programs’ financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. Crawford & Associates, P.C. was retained by the Oklahoma Water Resources Board, on behalf of the Program, to provide contract bookkeeping services and assist with pre-audit preparation matters for the Revolving Loan Fund Program. There were no unresolved differences impacting our opinion on the Program’s financial statements as a result of these discussions. To our knowledge there were no other consultations with other accountants other than Crawford & Associates, P.C.

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as the Program’s auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition to our retention.
Other Matters

We applied certain limited procedures to Management’s Discussion and Analysis, which is required supplementary information (RSI) that supplements the basic financial statements. Our procedures consisted of inquiries of management regarding the methods of preparing the information and comparing the information for consistency with management’s responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We did not audit the RSI and do not express an opinion or provide any assurance on the RSI.

We were engaged to report on the supplemental combining financial statements-by program component, which accompany the financial statements but are not RSI. With respect to this supplementary information, we made certain inquiries of management and evaluated the form, content, and methods of preparing the information to determine that the information complies with accounting principles generally accepted in the United States of America, the method of preparing it has not changed from the prior period, and the information is appropriate and complete in relation to our audit of the financial statements. We compared and reconciled the supplementary information to the underlying accounting records used to prepare the financial statements or to the financial statements themselves.

Restriction on Use

This information is intended solely for the use of the Directors of the Oklahoma Department of Environmental Quality and management of the Program and is not intended to be, and should not be, used by anyone other than these specified parties.

Sincerely,

Arledge & Associates, P.C.
