

BONHAM NW, TEX.

Other information concerning the wetland resources depicted on this document may be available. For information, contact:

SPECIAL NOTE

This document was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified on the photographs based on vegetation, water hydrology, and geography in accordance with Classification Systems Manual, Department of the Interior, Bureau of Reclamation, National Wetland Inventory, Final Report, Series A (an Operational Draft), Cowardin, et al., 1977. The aerial photographs typically reflect conditions during the specific year and season when they were taken. In addition, there is a margin of error inherent in the use of the photographs. Thus, a detailed on the ground and historical verification of wetland boundaries established through photographic interpretation. In addition, some small wetlands and those obscured by dense forest cover may not be included on this map.

Federal, State and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt in either the design or contents of this inventory, to define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, State or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

SYMBOLGY EXAMPLE

NOTES TO THE USER

- Wetlands which have been field examined are indicated on the map by an asterisk (*).
- Dominance type (either vegetative or sedentary animal) can be added to the map by the interested user.
- Additions or corrections to the wetlands information displayed on this map are solicited. Please forward such information to the address indicated.

WETLAND LEGEND

U - Primarily represents upland areas, but may include unclassified wetlands such as man-modified areas, non photo-identifiable areas and/or unintentional omissions.

ECOLOGICAL SYSTEM

E - ESTUARINE

1 - Subtidal

2 - Intertidal

M - MARINE

1 - Subtidal

2 - Intertidal

ECOLOGICAL SYSTEM

P - PALUSTRINE

1 - Limnetic

2 - Littoral

L - LACUSTRINE

1 - Limnetic

2 - Littoral

ECOLOGICAL SYSTEM

R - RIVERINE

1 - Tidal

2 - Lower Perennial

3 - Upper Perennial

4 - Intermittent

5 - Unknown Perennial

MODIFYING TERMS

In order to more adequately describe wetland and aquatic habitats one or more of the water, regime, water chemistry, soil, or special modifiers may be applied to the class or lower level in the hierarchy. The formal modifier may also be applied to the ecological system.

WATER REGIMENTS

Non-Tidal

Tidal

Coastal Salinity

Inland Salinity

pH Modifiers for All Fresh Water
