Albuquerque, New Mexico 87103

SPECIAL NOTE

This document was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified on the photographs based on vegetation, visible hydrology, and geography in accordance with *Classification of Wetlands and Deep Water Habitats of the United States* (an Operational Draft), Cowardin, et al., 1977. The aerial photographs typically reflect conditions during the specific year and season when they were taken. In addition, there is a margin of error inherent in the use of the aerial photographs. Thus, a detailed on the ground and historical analysis of a single site may result in a revision of the wetland boundaries established through photographic interpretation. In addition, some areas of wetlands and those obscured by dense forest cover may not be included on this document.

Federal, State and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, State or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

SYMBOLGY EXAMPLE

NOTES TO THE USER

- Wetlands which have been field examined are indicated on the map by an asterisk (*).
- Dominance type (either vegetative or sedentary animal) can be added to the map by the interested user.
- Additional or corrections to the wetlands information displayed on this map are solicited. Please forward such information to the address indicated.
- Some areas designated RASB, RASBW, or RASBJ (intermittent streams) may not meet the definition of wetlands.

WETLAND LEGEND

U - Primarily represents upland areas, but may include unclassified wetlands such as man-modified areas, non-photos-identifiable areas and/or unintentional omissions.

E - ESTUARINE				M - MARINE			
1 - Subtidal				2 - Intertidal			
CLASS	ROCK	UNCONSOLIDATED BOTTOM	AS - AQUATIC BED	ROCK	UNCONSOLIDATED BOTTOM	AS - AQUATIC BED	ROCK
Subclass	1. Bare	2. Bare	3. Bare	1. Bare	2. Bare	3. Bare	4. Bare
P - PALUSTRINE				L - LACUSTRINE			
1 - Tidal				2 - Non-tidal			
CLASS	ROCK	UNCONSOLIDATED BOTTOM	AS - AQUATIC BED	ROCK	UNCONSOLIDATED BOTTOM	AS - AQUATIC BED	ROCK
Subclass	1. Bare	2. Bare	3. Bare	1. Bare	2. Bare	3. Bare	4. Bare
R - RIVERINE				S - SAVANNAH			
1 - Tidal				2 - Non-tidal			
CLASS	ROCK	UNCONSOLIDATED BOTTOM	AS - AQUATIC BED	ROCK	UNCONSOLIDATED BOTTOM	AS - AQUATIC BED	ROCK
Subclass	1. Bare	2. Bare	3. Bare	1. Bare	2. Bare	3. Bare	4. Bare

MODIFYING TERMS
In order to more adequately describe wetland and aquatic habitats one or more of the water regime, water chemistry, soil, or special modifiers may be applied at the class or lower level in the hierarchy. The farm modifier may also be applied to the ecological system.

WATER REGIME		WATER CHEMISTRY		SOIL		SPECIAL MODIFIERS	
1. Temporary	2. Permanent	1. Freshwater	2. Saltwater	1. Organic	2. Inorganic	1. Disturbed	2. Undisturbed
3. Seasonal	4. Artificial	3. Acidic	4. Alkaline	3. Acidic	4. Alkaline	3. Disturbed	4. Undisturbed
5. Seasonal	6. Artificial	5. Acidic	6. Alkaline	5. Acidic	6. Alkaline	5. Disturbed	6. Undisturbed

(1) EM - Emergent is only found in the Riverine Tidal and Riverine Lower Palustrine Ecological Subsystem. All other classes are found in the Riverine Ecological Subsystem.

(1) Information on the water regime modifiers found on this legend, but not found in the classification system, may be obtained from the above listed source.
