

NATIONAL WETLANDS INVENTORY
UNITED STATES DEPARTMENT OF THE INTERIOR

This is a detailed topographic map of the Bartlesville, Oklahoma area. The map shows the Mescalero River flowing through the region. Key features include contour lines indicating elevation, various place names such as Bartlesville, Mescalero, and Mescalero National Monument, and the Mescalero River. The map is oriented with North at the top. The map is labeled with 'TULSA NW' and 'BARTLESVILLE' at the bottom left, and 'BARTLESVILLE SE, OKLA.' at the bottom right. The map is also labeled with 'U.S. FISH & WILDLIFE SERVICE' at the bottom center.

Regional Director (ARDE) Region II
U.S. Fish and Wildlife Service
P.O. Box 1306
Albuquerque, New Mexico 87103

This document was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified on the photographs based on vegetation, vegetation cover, and topography in accordance with *Classification of Wetlands and Deepwater Habitats* (Cowardin and *et al.* 1979, *et al.* 1980) and *State (An Operational Draft)*, Cowardin, *et al.* 1977. The aerial photographs typically reflect conditions during the specific year and season when they were taken. In addition, the margin of error inherent in the use of the aerial photographs and the potential for misinterpretation of historical analysis of a single site may result in a revision of the wetland boundaries established through photographic interpretation. In addition, some small wetlands and those dominated by dense forest cover may not be included on this document.

Federal, State and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, State or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

SUBSYSTEM CLASS

EZEM5N

SUBCLASS, WATER REGIME

UPLAND (NON-WETLANDS)

Pf or PKf

FARMED WETLANDS CONTROLLED WATER REGIME

- Wetlands which have been field examined are indicated on the map by an asterisk (*)
- Dominance type (either vegetative or sedentary animal) can be added to the map by the interested user.
- Additions or corrections to the wetlands information displayed on this map are solicited. Please forward such information to the address indicated.
- Some areas designated RASB, R4SBW, or RASB (intermittent streams) may not meet the definition of wetlands.
