

NATIONAL WETLANDS INVENTORY
UNITED STATES DEPARTMENT OF THE INTERIOR

This is a detailed topographic map of the San Francisco Peninsula, California. The map shows the coastline of the peninsula, including the cities of San Francisco, San Jose, and Palo Alto. It also depicts the surrounding areas of Marin County and Contra Costa County. The map includes a grid of latitude and longitude coordinates, a scale bar, and various geographical features such as mountains, rivers, and roads. The map is oriented with North at the top.

- Wetlands which have been field examined are indicated on the map by an asterisk (*).
- Dominance type (either vegetative or sedentary animal) can be added to the map by the interested user.
- Additions or corrections to the wetlands information displayed on this map are solicited. Please forward such information to the address indicated.
- Some areas designated R4SB, R4SBW, or R4SBJ (intermittent streams) may not meet the definition of wetlands.

Prepared by Office of Biological Services
for the National Wetlands Inventory

Regional Director (ARDE) Region II
U.S. Fish and Wildlife Service
P.O. Box 1306
Albuquerque, New Mexico 87103

This document was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified on the photographs based on vegetation, visible hydrology, and topography in accordance with *Classification and Interpretation of Aerial Photographs* (U.S. Army, *States* (An Operational Draft), Cowardin, et al, 1977). The aerial photographs typically reflect conditions during the specific year and season when they were taken. In addition, the stereoscopic images may not include all of the aerial photographs. Thus, a detailed view of the ground and historical analysis of a single site may result in a revision of the wetland boundaries established through photographic interpretation. In addition, some small wetlands and those with dense forest cover may not be included on this document.

Federal, State and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, State or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.
