

**NATIONAL WETLANDS INVENTORY**  
UNITED STATES DEPARTMENT OF THE INTERIOR

A detailed topographic map of Caney, Oklahoma. The map features a grid system with latitude and longitude coordinates. Key geographical features include the Caney River, several creeks, and numerous contour lines indicating elevation. Place names such as Caney, Caney Creek, and Caney Hill are visible. The map also shows various landmarks, including a cemetery and a school. The title 'CANAY, OKLA.' is printed at the top left. The map is oriented with North at the top.

SCALE 1:24 000

The graphic scale bar consists of two horizontal lines. The top line is labeled '0' at the left end and '1' at the right end. Below this line, there are tick marks and labels for 0, 3000, 4000, 5000, 6000, and 7000 FEET. The bottom line is labeled '0' at the left end and '1 KILOMETER' at the right end. The bar is divided into segments corresponding to these units.

Other information including a narrative report concerning the wetland resources depicted on this document may be available. For information, contact:

### SPECIAL NOTE

**SPECIAL NOTE**

This document was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified on the photographs based on vegetation, visible hydrology, and geography in accordance with **Classification of Wetlands and Deepwater Habitats of the United States (FWS/OBS - 79/31 December 1979)**. The aerial photographs typically reflect conditions during the specific year and season when they were taken. In addition, there is a margin of error inherent in the use of the aerial photographs. Thus, a detailed on the ground and historical data, since such may result in a revision of the wetland boundaries established through photographic interpretation. In addition, some small wetlands and those obscured by dense forest cover may not be included on this document.

This document

Federal, State and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, State or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

## NOTES TO THE USER

- Wetlands which have been field examined are indicated on the map by an asterisk (\*)
- Additional comments or corrections to the wetlands information displayed on this map are solicited. Please forward such information to the address indicated.
- Subsystems, Classes, Subclasses, and Water Regimes in *italics* were developed specifically for NATIONAL WETLANDS INVENTORY mapping.
- Some areas designated as R4SB, R4SBW, OR R4SBJ (INTERMITTENT STREAMS) may not meet the definition of a wetland.
- This map uses the class Unconsolidated Shore (US).
- On earlier NWI maps that class was designated Beach/Bar (BB), or Flat (FL). Subclasses remain the same in both versions.
