Tulsa, OK 74127

**SPECIAL NOTE**  
This document was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified on the photographs based on vegetation, visible hydrology, and geography in accordance with Classification of Wetlands and Deep-Water Habitats of the United States (An Operational Draft), Cowardin, et al, 1977. The aerial photographs typically reflect conditions during the specific year and season when they were taken. In addition, there is a margin of error inherent in the use of the aerial photographs. Thus, a detailed on the ground and historical analysis of a single site may result in a revision of the wetland boundaries established through photographic interpretation. In addition, some small wetlands and those obscured by dense forest cover may not be included on this document.

**SYMBOLOLOGY EXAMPLE**

- NOTES TO THE USER**
- Wetlands which have been field examined are indicated on the map by an asterisk (\*).
  - Dominance type (either vegetative or sedentary animal) can be added to the map by the interested user.
  - Additions or corrections to the wetlands information displayed on this map are solicited. Please forward such information to the address indicated.
  - Some areas designated R4SB, R4SBW, or R4SBJ (intermittent streams) may not meet the definition of wetlands.
