

**NATIONAL WETLANDS INVENTORY**  
UNITED STATES DEPARTMENT OF THE INTERIOR

DELAWARE, OKLA.

TULSA NW  
BARTLESVILLE

SCALE 1:24 000

### SPECIAL NOTE

This document was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified on the photographs based on vegetation, visible hydrology, and other features. The document is titled "Wetlands and Deep-Water Habitats of the United States (An Operational Draft), Cowardin, et al, 1977." The aerial photographs typically reflect conditions during the specific year and season when they were taken. In addition, the aerial photographs may not show all of the wetland aerial photographs. Thus, a detailed on the ground and historical analysis of a single site may result in a revision of the wetland boundaries established through photographic interpretation. In addition, some small features and the boundaries by dense forest cover may not be included on this document.

Federal, State and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas

## NOTES TO THE USER

- Wetlands which have been field examined are indicated on the map by an asterisk (\*).
- Dominance type (either vegetative or sedentary animal) can be added to the map by the interested user.
- Additions or corrections to the wetlands information displayed on this map are solicited. Please forward such information to the address indicated.
- Some areas designated R4SB, R4SBW, or R4SBJ (intermittent streams) may not meet the definition of wetlands.
