

NATIONAL WETLANDS INVENTORY
UNITED STATES DEPARTMENT OF THE INTERIOR

[illegible]

FORT SILL, OKLA.

The diagram consists of three horizontal number lines, each with a different scale and unit.

- Top line:** Labeled "1 MILE" at the right end. It has major tick marks at 0, 1000, 2000, 3000, 4000, 5000, 6000, and 7000 FEET. There are also minor tick marks between the major ones.
- Middle line:** Labeled "1 MILE" at the right end. It has major tick marks at 0, 1000, 2000, 3000, 4000, 5000, 6000, and 7000 FEET. There are also minor tick marks between the major ones.
- Bottom line:** Labeled "1 KILOMETER" at the right end. It has major tick marks at 0, 500, and 1000 METERS. There are also minor tick marks between the major ones.

This document was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified on the photographs based on vegetation, visible water, and other features. The analysis was done in accordance with Classification of Wetlands and Deepwater Habitats of the United States (FWS/OBS - 79/31 December 1979). The aerial photographs typically reflect conditions during the specific year and season when they were taken. In addition, there are many factors that can affect the appearance of aerial photographs. Thus, a detailed view of the ground and historical analysis of a single site may result in a revision of the wetland boundaries established through photographic interpretation. In addition, some small wetlands and those with sparse forest cover may not be included on this document.

- Wetlands which have been field examined are indicated on the map by an asterisk (*).
- Additions or corrections to the wetlands information displayed on this map are solicited. Please forward such information to the address indicated.
- Subsystems, Classes, Subclasses, and Water Regimes in *italics* were developed specifically for NATIONAL WETLANDS INVENTORY mapping.
 - Some areas designated as R4SB, R4SBW, OR R4SBJ (INTACTNESS STREAMS) may not meet the definition of wetland.
- This map uses the class Unconsolidated Shore (US). On earlier NWI maps that class was designated Beach/Bar (BB), or Flat (FL). Subclasses remain the same in both versions.
