

NATIONAL WETLANDS INVENTORY
UNITED STATES DEPARTMENT OF THE INTERIOR

This is a detailed topographic map of Fort Smith, Arkansas, and the surrounding region. The map shows the Arkansas River flowing through the center, with various towns and cities labeled, including Van Buren, Dorra, and Fort Smith. The map is covered with numerous contour lines indicating elevation, and various military or administrative codes are scattered throughout, such as POWH, PFOIA, R4SBC, and L2USCH. The map also shows a grid system with letters and numbers. The title "FORT SMITH, ARK.-OKLA." is at the top left, and the page number "94" is at the bottom right.

SCALE 1.24 000

This document was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified on the photographs based on vegetation, hydrology, and geographical features. The **Deep-Water Habitats of the United States** (An Operational Draft), Cowardin, et al. 1977. The aerial photographs typically reflect conditions during a specific year and season. Therefore, they were taken, in addition to the errors of interpretation, an additional source of error inherent in the use of the aerial photographs. Thus, a detailed on the ground and historical analysis of a single site may result in a revision of the wetland boundaries established on the aerial photographs. In addition, some small wetlands and those determined by dense forest cover may not be included in this document.

Federal, State and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, State or local agencies concerning specified agency regulatory programs.

CONTROLLED WATER REGIME

- Wetlands which have been field examined are indicated on the map by an asterisk (*).
- Dominance type (either vegetative or sedentary animal) can be added to the map by the interested user.
- Additions or corrections to the wetlands information displayed on this map are solicited. Please forward such information to the address indicated.
- Some areas designated R4SB, R4SBW, or R4SB- (intermittent streams) may not meet the definition of wetlands.
