This is a detailed topographic map of the Hominy, Oklahoma area. The map features contour lines indicating elevation, with major contours every 100 feet. The Hominy River is shown flowing through the center of the map. The town of Hominy is located in the lower right quadrant. The map includes a grid with coordinates ranging from 36° 22' 30" N to 36° 30' N and 96° 22' 30" W to 96° 30' W. A scale bar at the bottom indicates distances in feet (0 to 2,450) and miles (0 to 1.5). The map is labeled with various place names, including Hominy, Oklahoma, and the Hominy River. The map is also labeled with various coordinates and grid lines.

Federal, State and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, State or local agencies concerning specified agency regulatory programs, and proprietary jurisdictions that may affect

- Wetlands which have been field examined are indicated on the map by an asterisk.
- Addendum: If you have the wetlands information displayed on this map are solicited. Please forward such information to the address indicated.
- Subsystems, Classes, Subclasses, and Water Regimes in *italics* were developed specifically for NATIONAL WETLANDS INVENTORY mapping.
- Some areas designated as R4SB, R4SBW, OR R4SBJ (INTERMITTENT STREAMS) may not meet the definition of wetland.
- This map uses the class Unconsolidated Shore (US).
- On LANDS NWI maps that class was designated Beach/Bar (BB), or Flat (FL). Subclasses remain the same in both versions.
