Albuquerque, New Mexico 87103**

SPECIAL NOTE

SPECIAL NOTE: This analysis was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified on the photographs based on vegetation, visible hydrology, and geography in accordance with Classification of Wetlands and Deepwater Habitats (FWS/OBS-83/30) (States (FWS/OBS- 79/31 December 1979). The aerial photographs typically reflect conditions during the specific year and season when they were taken. In addition, there is a margin of error inherent in the use of the aerial photographs. The use of aerial photographs for the analysis of a single site may result in a revision of the wetland boundaries established through photographic interpretation. In addition, some small wetlands and those obscured by dense forest cover may not be included on

Federal, State and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the geographical scope of the regulatory programs of government agencies. **Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, State or local governing jurisdictional agency regulatory programs and proprietary jurisdictions that may affect such activities.**

SYMBOLGY EXAMPLE

SYSTEM
SUBSYSTEM
CLASS
L2EM2F
SUBCLASS, WATER R
UPLAND (NON-WETLAND)
R20WH
(LINEAR DEEPWATER HABITAT)

U - Primarily represents **upland** areas, but may include unclassified wetlands such as man-modified areas, non photo-identifiable areas and/or unintentional omissions.

NOTES TO THE USER

- NOTES TO USER:**
- Wetlands which have been field examined are indicated on the map by an asterisk (*).
 - Additions or corrections to the wetlands information displayed on this map are solicited. Please forward such information to the address below.
 - Subsystems, Classes, Subclasses, and Water Regimes in *italics* were developed specifically for NATIONAL WETLANDS INVENTORY mapping.
 - Some areas designated as RASB, R4SBW, or R4SBJ (PERMANENT STREAMS) may not meet the definition of wetland.
 - This map uses the class Unconsolidated Shore (US).
 - On earlier NWI maps that class was designated Beach/Bar (BB), or Flat (FL). Subclasses remain the same in both.
