

NATIONAL WETLANDS INVENTORY
UNITED STATES DEPARTMENT OF THE INTERIOR

MUTUAL, OKLA

WOODWARD SW
WOODWARD

MUTUAL, OKLA.

SCALE 1:24 000

A graphic scale bar is shown at the bottom of the page. It consists of a horizontal line with tick marks. Below the line, the word "FEET" is written, and the numbers 0, 3000, 4000, 5000, 6000, and 7000 are marked. Above the line, the word "MIL" (miles) is written at the right end, indicating that the scale represents distances in miles.

Albuquerque, New Mexico 87103**

SPECIAL NOTE

This document was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified from aerial photographs based on vegetation, water, hydrology, and geophysics (U.S. Fish and Wildlife Service, *Wetlands and Geophysics of the Coastal Plain of the United States (FWS/OBS - 79/31 December 1979)*). The aerial photographs typically reflect conditions during the specific year of the photograph. Aerial photographs are subject to a margin of error inherent in the use of the aerial photographs. Thus, a detail on the ground and historical analysis of a single site may result in a revision of the wetland boundaries established through photographic analysis. In some addition, some small wetlands may be obscured by dense forest cover may not be included on this document.

Federal, State and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, State or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

UPLAND* (NON-WETLAND)

R20WH

(LINEAR DEEPWATER HABITAT)

NOTES TO THE USER

- Wetlands which have been field examined are indicated on the map by an asterisk (*).
- Additional comments regarding wetlands information displayed on this map are solicited. Please forward such information to the address indicated.
- Subsystems, Classes, Subclasses, and Water Regions in *Italics* were developed specifically for NATIONAL WETLANDS INVENTORY mapping.
- Some areas designated as RASB, R4SBW, R4 RSBJ (INTERMITTENT STREAMS) may not meet the definition of wetland.
- This map uses the class Unconsolidated Shore (US). On the 1984 NWI maps this class was designated Beach/Bar (BB), or Flat (FL). Subclasses remain the same in both versions.
