Albuquerque, New Mexico 87103**

### SPECIAL NOTE

**SPECIAL NOTE**

This document was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified on the photographs based on vegetation, visible hydrology, and geology in accordance with the *Classification of Wetlands and Deepwater Habitats of the United States* (FWS/OBS - 79/31 December 1979). The aerial photographs typically reflect conditions during the specific year and season when they were taken. In addition, there is a margin of error inherent in the use of the aerial photographs. Thus, a detailed on the ground and historical analysis of the site may result in a revision of the wetland boundaries established through photographic interpretation. In addition, some small wetlands and those obscured by dense forest cover may not be included on this document.

different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the geographical scope of the regulatory programs of government agencies. **Persons intending to engage in activities involving modifications within or adjacent to wetland areas** should seek advice of appropriate Federal, State or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

### SYMBOLGY EXAMPLE

SYSTEM

SUBSYSTEM CLASS

**L2EM2F**

SUBCLASS, WATER REGIME

UPLAND (NON-WETLAND)

**R2OWH**  
(LINEAR DEEPWATER HABITAT)

U - Primarily represents upland areas, but may include unclassified wetlands such as man-modified areas, non-photo-identifiable areas and/or unintentional omissions.

## NOTES TO THE USER

- **NOTES TO THE USER**
  - Wetlands which have been field examined are indicated on the map by an asterisk (\*).
  - Additional or corrected information to the wetlands information displayed on this map are solicited. Please forward such information to the address indicated.
  - Subsystems, Classes, Subclasses, and Water Regimes in *italics* were developed specifically for NATIONAL WETLANDS INVENTORY mapping.
  - Some areas designated as R4SB, R4SBW, OR R4SBJ (INTERMITTENT STREAMS) may not meet the definition of wetland.
  - This map uses the class Unconsolidated Shore (US).
  - On early NWI maps that class was designated Beach/Bar (BB), or Flat (FL). Subclasses remain the same in both versions.
