

3597-123
NORMAN, OKLA.

SCALE 1:24 000

The graphic scale bar is divided into three units: feet, miles, and kilometers. The top scale is in feet, ranging from 0 to 7000 with major markings every 1000 feet and minor markings every 200 feet. The middle scale is in miles, ranging from 0 to 1 mile with a major marking at 1 mile and minor markings every 0.2 miles. The bottom scale is in kilometers, ranging from 0 to 1 kilometer with major markings every 0.5 kilometers and minor markings every 0.1 kilometers.

Other information concerning the wetland resources depicted on this document may be available. For information, contact:

SPECIAL NOT

This document was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified on the photographs based on vegetation, visible hydrology, and geography in relation to the Wetlands of the United States (An Operational Draft, Cowardin, et al. 1977). The aerial photographs typically reflect conditions during the specific year and season when they were taken. In addition, the aerial photographs are not always of the same scale. Thus, a detailed on the ground and historical analysis of a single site may result in a revision of the wetland boundaries established through photographic interpretation. In addition, some small wetlands and those with a dense forest cover may not be included on this document.

Federal, State and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, State or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

SYMBOLGY EXAMPLE

NOTES TO THE USER

- Wetlands which have been field examined are indicated on the map by an asterisk (*).
- Dominance type (either vegetative or sedentary animal) can be added to the map by the interested user.
- Additions or corrections to the wetlands information displayed on this map are solicited. Please forward such information to the address indicated.
- Some areas designated R4SB, R4SBW, or R4SBJ (intermittent streams) may not meet the definition of wetlands.
