

OKMULGEE NE 1981

UNITED STATES DEPARTMENT OF THE INTERIOR

OKMULGEE NE, OKLA.

SPECIAL NOTE

SPECIAL NOTE

This document was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified on the photographs based on vegetation patterns and colors. The aerial photographs were identified with Classification of Wetlands and Deep-Water Habitats of the United States (An Operational Draft), Cowardin, et al, 1977. The aerial photographs typically were taken in the summer season when they were taken. In addition, there is a margin of error inherent in the use of the aerial photographs. Thus, a detailed on the ground survey of the wetland boundaries established through photographic interpretation. In addition, some small wetlands and those obscured by dense forest cover may not be included on this document.

Federal, State and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that which is used in the design of this inventory. To define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the proper jurisdiction of any Federal, State or local government. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, State or local government agency regulatory programs.

CONTROLLED WATER REGIME

NOTES TO THE USER

- ### NOTES TO THE USER
- Wetlands which have been field examined are indicated on the map by an asterisk (*).
 - Dominance type (either vegetative or sedentary animal) can be added to the map by the interested user.
 - Additions or corrections to the wetlands information displayed on this map are solicited. Please forward such information to the address indicated.
 - Some areas designated R4SB, R4SBW, or R4SBJ (intermittent streams) may not meet the definition of wetlands.
