

## **NATIONAL WETLANDS INVENTORY** UNITED STATES DEPARTMENT OF THE INTERIOR PAGE SW, OKLA. POWHh R3ÓWH R3OWH

R2ÓWH R30WH POWHH MC ALESTER NE 94°37′30″ MENA PAGE SW, OKLA. NOTES TO THE USER

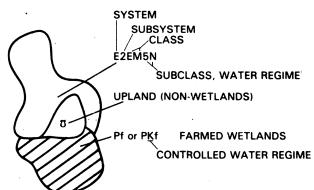

Wetlands which have been field examined are indicated on the map by an asterisk (\*).

Dominance type (either vegetative or sedentary animal) can be added to the map by the interested user. SPECIAL NOTE SYMBOLOGY EXAMPLE

Other information concerning the wetland resources depicted on this document may be available. For information, contact: Regional Director (ARDE) Region II U.S. Fish and Wildlife Service P.O. Box 1306 Albuquerque, New Mexico 87103

This document was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified on the photographs based on vegetation, visible hydrology, and geography in accordance with Classification of Wetlands and Deep-Water Habitats of the United States (An Operational Draft), Cowardin, et al, 1977. The aerial photographs typically reflect conditions during the specific year and season when they were taken in additional during the specific year and season when they were taken in additional during the specific year and season when they were taken in additional during the specific year and season when they were taken in additional during the specific year and season when they were taken in additional during the specific year and season when they were taken in additional during the specific year and season when they were taken in additional during the specific year and season when they were taken in the specific year and season when they were taken in the specific year and season when they were taken in the specific year and season when they were taken in the specific year and season when they were taken in the specific year and season when they were taken in the specific year. aerial photographs typically reflect conditions during the specific year and season when they were taken. In addition, there is a margin of error inherent in the use of the aerial photographs. Thus, a detailed on the ground and historical analysis of a single site may result in a revision of the wetland boundaries established through photographic interpretation. In addition, some small wetlands and those

obscured by dense forest cover may not be included on this document. Federal, State and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal. State or local should seek the advice of appropriate Federal, State or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

 Additions or corrections to the wetlands information displayed on this map are solicited. Please forward such information to the address indicated.

• Some areas designated R4SB, R4SBW, or R4SBJ (intermittent streams) may not meet the definition of
