

NATIONAL WETLANDS INVENTORY
UNITED STATES DEPARTMENT OF THE INTERIOR

This is a detailed topographic map of a region in Putnam County, West Virginia. The map features contour lines indicating elevation, with labels such as 1000, 1200, and 1400 feet. A grid of latitude and longitude coordinates is overlaid on the map, with latitude ranging from 36° 00' N to 37° 30' N and longitude from 80° 00' W to 80° 30' W. The map is titled "2-CLT-H8" in the top right corner. The map shows two main gas fields: the Taloga Gas Field and the Andrews Gas Field. Numerous well locations are marked with codes such as PUBH, PFOA, R45BA, and R45BC. The map also shows roads, including US Route 183, and various geographical features like hills and valleys. The map is a black and white reproduction of a topographic map.

PUTNAM NW, OKLA.

Other information including a narrative report concerning the wetland resources depicted on this document may be available. For information, contact:

SPECIAL NOTE

SPECIAL NOTE

This document was prepared primarily by stereoscopic analysis of the altitude aerial photographs. Wetlands were identified on the photographs based on vegetation, visible hydrology, and geography in accordance with **Classification of Wetlands and Deepwater Habitats of the United States** (FWS/OBS - 79/31 December 1979). The aerial photographs typically reflect conditions during the specific year and season when they were taken. In addition, there is a margin of error inherent in the use of the aerial photographs. Thus, a detailed on the ground and historical analysis of the wetland study area is required to establish the boundary lines established through photographic interpretation. In addition, some small wetlands and those obscured by dense forest cover may not be included on this document.

Federal, State and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities with potential modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, State or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

NOTES TO THE USER

- Wetlands which have been field examined are indicated on the map by an asterisk (*).
- Additions or corrections to the wetlands information displayed on this map are solicited. Please forward such information to the address indicated.
- Subsystems, Classes, Subclasses, and Water Regimes in *italics* were developed specifically for NATIONAL WETLANDS INVENTORY mapping.
- Some areas designated as R4SB, R4SBW, Or R4SBJ (INTERMITTENT STREAMS) may not meet the definition of wetland.
- This map uses the class Unconsolidated Shore (US). On earlier NWI maps that class was designated Beach/Bar (BB), or Flat (FL). Subclasses remain the same in both versions.
