ROUGH CREEK, OKLA.

U.S. DEPARTMENT OF THE INTERIOR
FISH AND WILDLIFE SERVICE
Prepared by National Wetlands Inventory
1989

NOTES TO THE USER

- Wetlands which have been field examined are indicated on the map by an asterisk (*).
- Additions or corrections to the wetlands information displayed on this map are solicited. Please forward such information to the address indicated.
- Subsystems, Classes, Subclasses, and Water Regimes in *Wetlands* were developed specifically for NATIONAL - **WETLANDS INVENTORY** mapping.
- Some areas designated as R4SB, R4SBW, OR R4SBJ (INTERMITTENT STREAMS) may not meet the definition of wetland.
- This map uses the class Unconsolidated Shore (US). On earlier NWI maps that class was designated Beach/Bar (BB), or Flat (FL). Subclasses remain the same in both versions.

AERIAL PHOTOGRAPHY

DATE: 10/1/11 1:58 000

DATE: / /

SPECIAL NOTE

This document was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified on the photographs based on vegetation, visible hydrology, and geography in accordance with *Classification of Wetlands and Deepwater Habitats* (FWS/OBS-83/30, December 1979). The aerial photographs typically reflect conditions during the specific year and season when they were taken. In addition, there is a margin of error inherent in the use of the aerial photographs. Thus, a detailed review of the aerial photographs may result in a revision of the wetland boundaries established through photographic interpretation. In addition, some small wetlands and those obscured by dense forest cover may not be included on

Federal, State and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the geographical scope of the regulatory programs of government agencies. **Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, State or local agencies concerning specified agency regulatory**

SYMBOLOLOGY EXAMPLE

The diagram illustrates a cross-section of a wetland with different habitat types. The classification hierarchy is as follows:

- SYSTEM** (the entire wetland area)
- SUBSYSTEM CLASS** (the entire wetland area)
- L2EM2F** (the entire wetland area)
- SUBCLASS, WATER REGIME** (the entire wetland area)
- UPLAND (NON-WETLAND)** (the area above the water table)
- R2OWH (LINEAR DEEPWATER HABITAT)** (the area below the water table)

U - Primarily represents upland areas, but may include

☐ 1 acre

 10 acres

ACREAGE GUIDE

☐ 20 acres

Other information including a narrative report concerning the wetland resources depicted on this document may be available. For information, contact:
