

NATIONAL WETLANDS INVENTORY
UNITED STATES DEPARTMENT OF THE INTERIOR

This is a detailed topographic map of the Wildcat Mountains Wildlife Refuge area, spanning Kiowa and Comanche Counties in Oklahoma. The map features a grid with coordinates (e.g., 34° 45' N, 98° 37' W) and a scale bar indicating distances in miles and feet. The refuge boundary is clearly marked, and the map includes numerous points of interest labeled with codes such as PUBHh, PFOIA, PEMIA, R45BC, R2UBH, and R45BA. The map also shows the surrounding terrain, including the Wildcat Mountains, Saddle Mountain, and various ridges and valleys. The map is oriented with North at the top.

SADDLE MOUNTAIN, OKLA.

This document was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified on the photographs based on vegetation, visible hydrology, and geography in accordance with **Classification of Wetlands and Deepwater Habitats of the United States (FWS/OBS - 79/31 December 1979)**. The aerial photographs typically reflect conditions during the specific year and season when they were taken. In addition, there is a margin of error inherent in the use of the aerial photographs to determine, for example, the gross and historic area of a single site, may result in a revision of the wetland boundaries established through photographic interpretation. In addition, some small wetlands and those obscured by dense forest cover may not be included on this document.

Other information including a narrative report concerning the wetland resources depicted on this document may be available. For information, contact:

NOTES TO THE USER

- Wetlands which have been field examined are indicated on the map by an asterisk (*).
- Additions or corrections to the wetlands information displayed on this map are solicited. Please forward such information to the address indicated.
- Subsystems, Classes, Subclasses, and Water Regimes in *italics* were developed specifically for NATIONAL WETLANDS INVENTORY mapping.
- Some areas designated as R4SB, R4SBW, OR R4SBJ (INTERMITTENT STREAMS) may not meet the definition of a stream.
- This map uses the class Unconsolidated Shore (US).
- On earlier NWI maps that class was designated Beach/Bar (BB), or Flat (FL). Subclasses remain the same in both versions.
