

NATIONAL WETLANDS INVENTORY

UNITED STATES DEPARTMENT OF THE INTERIOR

UNITED STATES DEPARTMENT OF THE INTERIOR

SEMINOLE, OKLA.

6°45' OKLAHOMA CITY SE

SHAWNEE

SCALE 1:24 000

A horizontal scale bar representing a distance of 7000 feet. The bar is divided into segments by numerical labels: 0, 3000, 4000, 5000, 6000, and 7000. The word "FEET" is written vertically below the 7000 mark. At the far right end of the bar, the text "1 MI" indicates a mile-long distance.

SPECIAL NOTE

SPECIAL NOTE

This document was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified on the photographs based on vegetation, visible hydrology, and geography in accordance with **Classification of Wetlands and Deep-Water Habitats of the United States** (An Operational Draft), Cowardin, et al, 1977. The aerial photographs typically reflect conditions during the specific year and season when they were taken. In addition, there is a margin of error inherent in the use of the aerial photographs. Thus, a detailed on the ground and historical analysis of a single site may result in a revision of the wetland boundaries established through photographic interpretation. In addition, some small wetlands and those obscured by dense forest cover may not be included on this document.

SYMBOLS EXAMPLE

The diagram illustrates a conceptual model of land systems. A large irregular shape represents the landscape. Inside, a smaller irregular shape is labeled "UPLAND (NON-WETLANDS)". To the right of this shape is the label "FARMED WETLANDS". A horizontal line extends from the top of the inner shape to the right, ending in an arrowhead pointing to the label "Pf or PKf". From the same horizontal line, another arrowhead points down to a small circle containing the symbol "Ø". Above the landscape, the word "SYSTEM" is at the top level, connected by a line to "SUBSYSTEM", which connects to "CLASS". Below "CLASS" is the code "E2EM5N". A line from "E2EM5N" points down to "SUBCLASS, WATER REGIME".

NOTES TO THE USER

- Wetlands which have been field examined are indicated on the map by an asterisk (*).
- Dominance type (either vegetative or sedentary animal) can be added to the map by the interested user.
- Additions or corrections to the wetlands information displayed on this map are solicited. Please forward such information to the address indicated.
- Some areas designated R4SB, R4SBW, or R4SBJ (intermittent streams) may not meet the definition of wetlands.
