ACREAGE GUIDE

10 acres

20 acres

☐ 1 acre

Regional Director (ARDE) Region II U.S. Fish and Wildlife Service P.O. Box 1306 Albuquerque, New Mexico 87103

SPECIAL NOTE This document was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified on the photographs based on vegetation, visible hydrology, and geography in accordance with Classification of Wetlands and Deepwater Habitats of the United States (FWS/OBS - 79/31 December 1979). The aerial photographs typically reflect conditions during the specific year and season when they were taken. In addition, there is a margin of error inherent in the use of the aerial photographs. Thus, a detailed on the ground and historical analysis of a single site may result in a revision of the wetland boundaries established through photographic interpretation. In addition, some small wetlands and those

obscured by dense forest cover may not be included on this document. Federal, State and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, State or local agencies concerning specified agency regulatory

programs and proprietary jurisdictions that may affect

such activities.

SUBSYSTEM CLASS L2EM2F SUBCLASS, WATER REGIME UPLAND (NON-WETLAND)

SYMBOLOGY EXAMPLE

R20WH (LINEAR DEEPWATER HABITAT)

unclassified wetlands such as man-modified areas, non

photo-identifiable areas and/or unintentional omissions.

NOTES TO THE USER

 Wetlands which have been field examined are indicated on the map by an asterisk (*). Additions or corrections to the wetlands information displayed on this map are solicited. Please forward such

information to the address indicated. • Subsystems, Classes, Subclasses, and Water Regimes in *Italics* were developed specifically for NATIONAL WETLANDS INVENTORY mapping.

• Some areas designated as R4SB, R4SBW, OR R4SBJ (INTERMITTENT STREAMS) may not meet the defini-

tion of wetland. • This map uses the class Unconsolidated Shore (US). On earlier NWI maps that class was designated Beach/ Bar (BB), or Flat (FL). Subclasses remain the same in both
