UNITED STATES DEPARTMENT OF THE INTERIOR

This is a detailed topographic map of the Fort Smith, Arkansas area. The map shows the Arkansas River flowing through the region, with various islands and bends. The terrain is depicted with contour lines, indicating elevation. Key locations labeled include Fort Smith, Arkansas, and surrounding areas like Wagoner County and Muskogee County. The map includes a grid with coordinates, with latitude ranging from 35° 30' N to 35° 52' 30' N and longitude from 93° 30' W to 93° 45' W. The map is titled 'FORT SMITH, ARKANSAS' at the top. The map is a black and white reproduction of a historical map, showing various landmarks, roads, and geographical features. The map is oriented with North at the top. The map is a detailed topographic map of the Fort Smith, Arkansas area, showing the Arkansas River, surrounding terrain, and various landmarks. The map includes a grid with coordinates and labels for locations like Fort Smith, Arkansas, and surrounding areas. The map is titled 'FORT SMITH, ARKANSAS' at the top.

Diagram illustrating the conversion of a mile to feet and kilometers. The top scale shows a mile (1 MILE) equivalent to 5280 feet (0 to 7000 FEET). The bottom scale shows a mile (1 MILE) equivalent to approximately 1.609 kilometers (0 to 1 KILOMETER).

This document was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified on the photographs based on vegetation, water, and other features. The order of the report is the classification of Wetlands and Deep-Water Habitats of the United States (An Operational Draft), Cowardin, et al, 1977. The aerial photographs typically reflect conditions during the specific year and season when they were taken and are not intended to be an accurate representation of the current conditions of the aerial photographs. Thus, a detailed on the ground and historical analysis of a single site may result in a revision of the wetland boundaries established through photographic interpretation. In addition, some small areas of wetland observed in dense forest cover may not be included in this document.

Federal, State and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, State or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

CONTROLLED WATER REGIME

- Wetlands which have been field examined are indicated on the map by an asterisk (*).
- Dominance type (either vegetative or sedentary animal) can be added to the map by the interested user.
- Additions or corrections to the wetlands information displayed on this map are solicited. Please forward such information to the address indicated.
- Some areas designated R4SB, R4SBW, or R4SBJ (intermittent streams) may not meet the definition of wetlands.
