

NATIONAL WETLANDS INVENTORY
UNITED STATES DEPARTMENT OF THE INTERIOR

TEXHOMA SW, OKLA.-TEX.

Federal, State and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the geographical scope of the regulatory programs of government agencies. **Persons intending to engage in activities involving modifications within or adjacent to wetland areas** should consult with appropriate Federal, State or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

The diagram shows a hierarchical classification system for a wetland area. It starts with a large, irregular shape representing the entire area. This shape is divided into two main regions: a larger, more complex shape on the left and a smaller, simpler shape on the right. The larger shape is further divided into two sub-regions: a larger, more complex shape on the left and a smaller, simpler shape on the right. The smaller shape on the right is labeled 'UPLAND (NON-WETLAND)'. The larger shape on the left is labeled 'SUBCLASS, WATER REGIME'. This larger shape is further divided into two sub-regions: a larger, more complex shape on the left and a smaller, simpler shape on the right. The smaller shape on the right is labeled 'R20WH (LINEAR DEEPWATER HABITAT)'. The larger shape on the left is labeled 'L2EM2F'. This larger shape is further divided into two sub-regions: a larger, more complex shape on the left and a smaller, simpler shape on the right. The smaller shape on the right is labeled 'SUBSYSTEM CLASS'. The larger shape on the left is labeled 'SYSTEM'.

R20WH
(LINEAR DEEPWATER HABITAT)

- Wetlands which have been field examined are indicated on the map by an asterisk (*).
- Additions or corrections to the wetlands information suggested by the user should be solicited. Please forward such information to the address indicated.
- Subsystems, Classes, Subclasses, and Water Regimes in *italics* were developed specifically for NATIONAL WETLANDS INVENTORY mapping.
- Some areas designated as R4SB, R4SBW, OR R4SBJ (INTERMITTENT STREAMS) may not meet the definition of wetland.
- This map uses the class Unconsolidated Shore (US).
- On the NWI map, the class that was designated Beach/Bar (BB), or Flat (FL) Subclasses remain the same in both versions.
