

May 28, 2012

To: Honorable Members of the Oklahoma Water Resources Board

The proposed phase-in is analogous to allowing some landowners to harvest 24 deer on their property while the rest of us are only able to take 2. If both the wildlife and the groundwater are shared resources, how could this be fair to allow some landowners to take so much more than others just because they have done so in the past. We are being punished for not depleting the Aquifer at the same rate as others.

Sincerely,

Cinco Roos
